

Higher quality of service to growers. Better outcomes.

Solinftec is the operating system for your custom application business. We take technical efficiency to a new level, **connecting real-time data across the field** to help you fine tune your entire system.

At Solinftec, we don't just apply technology *to* agriculture.
We build the best technology *for* agriculture.

Delivering ROI unmatched in agtech.

Our technology is built to think as you do, with a total view of the field.

We consider your unique inputs and use machine learning to automate operations from farm to farm. Let us be your partner in custom application by optimizing, monitoring and improving the efficiency of your entire fleet of sprayers, spreaders and tender trucks.

Let our results do the talking:

SCHEDULING

15% MORE EFFICIENT TRAVEL

Based off of 4.2M applied acres in 2019,2020

POTENTIAL SAVINGS

\$57,800 PER SPRAYER PER YEAR

TENDER TRUCKS & APPLICATION MACHINES

25% LESS STOPPED & DRIVING TIME

What this means for you:

- **Higher quality of service for your growers**, with fields applied accurately and on time.
- **Technology that predicts upcoming conditions** and pivots when things change.
- **Less time spent creating a schedule** and planning for tomorrow with the flexibility to adjust to your business's unique needs.
- **Live view of your fleet getting the job done** - arriving at the right field at the right time with the right product.
- **More efficient and informed workforce** - from the office to the field - with less time waiting or discussing next steps.

Solinftec considers farm locations, weather forecasts, tank mix compatibility, product labels, cleaning times and more, so customers can predict upcoming conditions, solve problems and plan - with **efficiency previously unseen in agriculture.**

30K+ MACHINES
